

Hello, we are from Imamiya high school, Japan.

We have been looking forward to seeing you, and we are happy to finally meet you today.

My name is Shinpei Ueda, a president of the school council.

Let me introduce our school first.

Imamiya high school was built over a century ago in Osaka, which is the second biggest city in Japan.

We have 720 students, and 2/3 of us are girls, who are more powerful, tough and aggressive than us boys.

Our school is quite unique because we make our own time table from about hundred elective subjects.

There are many school events too, like the school festival and the sports day, and most of them are held by students.

We also have many club activities, and about 70% of students belong to one of those activities.

Especially the dance club has a lot of members.

They have won not only many contests in Japan, but also the championship held in America.

Through our busy but exciting school life, we have been developing strong personalities.

This is our second day of the school trip.

We did a lot of work to prepare for this trip, so we want to make it a wonderful experience.

So please tell us many things about your culture, school life, and so on.

I hope we can be good friends. Thank you.
